Appraisal Operation Summary

The districts appraisers make field inspections starting in October 2019 through April 2020 according to its Biennial Reappraisal Plan (as adopted in September 2018). Appraisers inspected properties for condition and property characteristics. Appraisers also inspected for new improvements that were added to the appraisal roll.

New property is discovered several different ways as follows below.

- City building permits
- Mechanics Liens filed in courthouse
- Mobile home installation reports
- Septic tank permits
- Electric connection reports
- Field discovery
- Public word of mouth
- Google Earth Maps

Cost tables for all improvements were reviewed and compared to updated cost information in Marshall Swift Valuation Service tables and updated the cost tables if needed.

The district conducted an internal ratio study to see if modifiers were needed to adjust appraisals to meet sales trends.
